

Professional-grade tDCS with intelligent connectivity

# Sooma Duo™

Our latest Transcranial Direct Current Stimulation (tDCS) device pairs virtual patient guidance with remote clinical monitoring for easier treatment sessions.

For Healthcare Professionals

A comprehensive tDCS treatment system to help patients and clinicians work together.

Secure Clinician  
Portal

Easy-to-Use Patient  
Mobile App

Remote management  
& monitoring

# Precision Therapy through Connectivity

Engage your patients in their care with mobile app-driven treatment sessions while taking advantage of remote protocol customization and monitoring.

## Empowering clinicians with data

View and customize all of your patients' treatment protocols and progress at a glance in one easy-to-use, secure platform.

## Guiding patients at every step

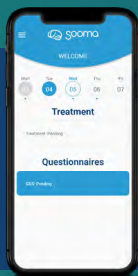

Sooma App guides patients through tDCS sessions, sends reminders, and provides educational resources for a seamless and effective treatment experience.

## Ensuring treatment compliance

The system provides patients with reminders and clinicians with adherence reports, adding a new level of convenience and precision to the treatment process.

## Duo works together with **Sooma App**
